Experience

Web Developer, ORG. TEND d.o.o. – Maribor, SI Aug 2020 – Present

- Developed and maintained MODX websites ranging from informational sites to e-commerce platforms, including WCAG accessibility compliance requirements.
- Maintained and extended TYPO3 systems, including upgrades, bug fixes, and feature development across existing production installations.
- Built backend systems and internal applications using Laravel, React, and InertiaJS.
- Contributed to the MODX open-source ecosystem by developing custom extensions, including authentication systems and Mailjet integrations.
- Supported server and intranet environments in secured setups, including Linux and Windows IIS configuration and web server management (Nginx/Apache).

IT Support Technician / Web Developer (various NGOs) – Remote Jul 2023 – Present

- Managed cloud services (Google Workspace & Microsoft 365) and provided IT support for the organization.
- Optimized operational costs through nonprofit licensing programs and SaaS consolidation.
- Managed and maintained WordPress-based (and similar) websites.
- Provided day-to-day IT support, including user assistance and general technical troubleshooting.

Head of IT, Slovensko Kosmatinsko Društvo – Remote 2023 – 2025

- Built a full-stack Next.js platform to manage the organization's entire member and event operations.
- Integrated Stripe and FLIK payment methods with automated fiscal reporting for all invoices.
- Handled VPS setup and maintenance, using Docker Swarm for containerized app deployments.
- Directed IT operations, including the strategic migration between Microsoft 365 and Google Workspace.

Information Technology Technician, Nova KBM d.d. – Maribor, SI 2017 – 2020

- Executed hardware migrations and workstation setups across bank departments under strict security standards.
- Resolved technical tickets for internal staff, troubleshooting hardware and software issues.
- Managed IT asset logistics, handling inventory tracking and labeling.
